

## ENGLISH

As we enter the Summer Term with our Year 1 students, we're eager to delve into a diverse selection of books that complement our afternoon lessons. Through these stories, your children will not only enjoy reading but also enhance their writing skills, learning to express themselves creatively and effectively.

Alongside this, we'll maintain our focus on reading progress using the RWI reading scheme during dedicated lessons. It's an exciting opportunity for growth and exploration as we embark on this journey together. Get ready for a term filled with adventure, learning, and lots of fun!

## History

The students will embark on an exciting journey through history as they explore the fascinating world of transport. From the invention of the first planes to the iconic steam train, they'll discover how these innovations shaped our world.

## Geography

We will be exploring the fascinating world of animals and their habitats in geography lessons. They'll learn about different ecosystems, animal adaptations, and the importance of protecting our natural world.

**Miss Woods**  
Teacher (1GW)

**Mrs Garrett**  
TA (1GW)

**Mrs Gibby**  
Teacher (1PG)

**Miss Hill**  
TA (1PG)

## Science

This term, we'll be delving into the fascinating world of plants and animals, exploring their unique needs and habitats. From discovering how plants harness sunlight to exploring the various habitats that support diverse animal life, our curriculum aims to spark curiosity and foster a deeper understanding of the natural world.

## Computing

We will delve into exciting computing activities aimed at honing key skills such as basic coding concepts, digital literacy, and creative problem-solving through engaging interactive projects.

## Music

The children will be exploring music through fun activities focusing on key skills such as rhythm, melody, and coordination. Get ready for a harmonious journey ahead!

## PSHE

Your Year 1 children will be exploring topics centred around their changing bodies and fostering healthy relationships. Lessons are tailored to their age, ensuring a supportive and informative environment.

## RE

We will be exploring stories from the Bible and delving into the teachings of Christianity. Through engaging activities, they'll develop a deeper understanding of faith.

## MATHS

As we venture into the summer term, we're excited to delve deeper into mathematics with your Year 1 children. Throughout the term, we'll be exploring numbers up to 100, reinforcing their understanding of place value and number relationships. Alongside this, we'll be continuing column addition, a foundational skill for their mathematical journey. Moreover, we have exciting topics lined up, including the beginnings of division and multiplication, sparking their curiosity, and laying the groundwork for future mathematical success. We're enthusiastic about the progress they will make and the fun we'll have along the way!

## Art

We will be diving into the wonderful world of self-portraits in their art lessons. They'll explore the excitement of capturing their unique features, personalities, and expressions through various mediums. This creative journey promises to inspire self-expression and foster artistic confidence.

## DT

In this summer term, our Year 1 children will be focussing on stable structures. Through engaging activities and hands-on projects, they will explore the principles of stability while constructing various models and learning valuable problem-solving skills.

## PE

The Year 1 children will be delving into the world of ball work, honing their coordination and teamwork skills. With a focus on fun and engagement, we'll be building up their confidence and abilities in various ball sports, all leading to an exciting Sports Day.
