

History

Through history, we want our children to gain a coherent knowledge and understanding of Britain's history, their locality, and the history of the wider world. We want our children to think deeply about the people and places in the past and how they are linked to society today. They will become familiar with using historical enquiry and have a good understanding of chronology.

Geography

Our geography curriculum encourages our children to be curious about their own locality and the wider world.

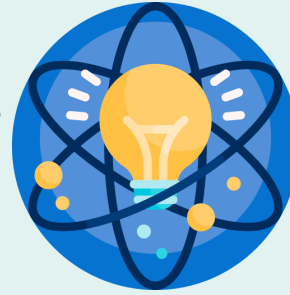

We want children to see the links between human and physical geography, to understand the world and the people within it. We want our children to think geographically, to see the world in a unique way, understanding complex problems and making connections from local to global.

Our Wider Curriculum Subjects

Science

The aim of our science curriculum is to enable children to understand the world around them. We want our children to become independent learners who are curious, passionate and have a desire for discovery, as well as have an appreciation for the importance of science in the wider world.

We strongly believe that every child should see themselves as a scientist and this is reflected in the diverse range of important scientists studied.

Grove
Primary School

Art

Through art and design, children will be given opportunities to develop ideas; master techniques; and take inspiration from the greats through painting, collaging, sculpture, drawing, printing, textiles, and digital media.

Pupils have opportunities to study the work of Frida Kahlo, Yayoi Kusama, Henri Rousseau, Sonia Delaunay amongst others.

DT

Our Design and Technology (DT) curriculum allows children to be engaged in projects that solve real and relevant problems within a variety of contexts.

We want our children to develop skills and knowledge in design, structures, mechanisms, electrical control, and a range of materials, including food.

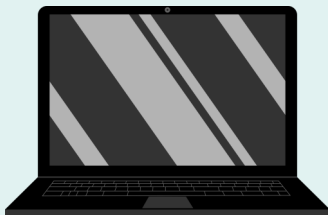

Computing

Our Wider Curriculum Subjects

Music

Through computing, we want our children to use digital technology safely and responsibly to help them solve real life problems.

We want our children to become competent, confident, and creative participants of an increasingly digital world. We want children to understand what computing is and the importance and value of studying the subject.

PE

High-quality PE is essential as it supports children's enjoyment of physical activity and commitment to a healthy active lifestyle.

Our PE curriculum focuses on pupil's acquisition, development and application of skills or tactics in a range of situations when working independently, co-operatively, or competitively. We also focus on the importance of routine exercise, encouraging this through our weekly circuit sessions.

RE

Our Religious Education curriculum enables children to understand the world around them and we develop this through discussion of the beliefs, values, and practices of a variety of religions.

We want our children to be respectful and tolerant of others and be able to communicate their own beliefs, values, and practices confidently. As a school that serves a diverse community, we strongly believe that through the teaching of RE, our children are better equipped to understand their peers and the wider world.

Grove
Primary School

Music is a unique way of communicating that can inspire and motivate children. We provide opportunities for all children to create, play and perform music and develop the skills to appreciate and appraise a wide variety of musical forms.

They will also learn about the 'language of music' - notation.

Spanish

In Spanish, our aim is to develop the confidence and competence of each child in the foreign language they are learning.

Our goal is for them to be passionate, curious and confident about their own foreign language learning abilities when they finish the primary school phase of their education.
